

Dear Members of the Carson Family Charitable Trust,

My name is Victoria Hannaford, and I am a junior from New London, CT. Thank you very much for your continuous financial support that allows me to attend Kenyon with greater ease. This year my younger sister is also attending college, so this scholarship means that I am able to attend Kenyon without placing a significant burden on my family. My time at Kenyon has been amazing and has already created a lasting impact on my life. This year has been my favorite year yet, as campus life has returned to normal. I feel that I have truly become a crucial part of the community. I am an Economics and History double major and I have recently declared a minor in Statistics as well. This semester is the first time that I have gotten to take Economics electives and I find both classes very interesting. My Econ of Regulation class examines economics from a legal standpoint, as we discuss antitrust regulation and specific antitrust cases. This is my favorite class because I am interested in pursuing a career in law and it ties both of my interests together. I really enjoy the variety of classes that I am able to take within my majors, as I believe they truly allow me to take advantage of the liberal arts experience. Outside of the classroom I am a member of the Women's soccer team, the Business and Finance Committee on Student Council, and the Kenyon Pre-Law Society. This year, my soccer team won our conference regular season championship! I was recently named team captain which has been a huge honor and I look forward to having this crucial role next season. I also work for the Office of Student Engagement, which has been a great way for me to understand the inner workings of campus life from both a student and administrative standpoint. On behalf of my family, I would like to thank you again for your continued generosity. Best,

Victoria Hannaford '24
